

FACTS ABOUT QUALITY NATURAL TURFGRASS

DID YOU KNOW?

- ⌚ A good quality lawn can add as much as 15% of the value of a house.
 - ⌚ A good fine textured lawn has at least 10,000 shoots and over 5,000,000 km of roots per square metre.
 - ⌚ Roots make up 90% of the weight of grass plants in the lawn.
 - ⌚ Natural Turfgrass acts as a natural filter by reducing pollution by purifying the water as it passes through the root zone.
 - ⌚ Natural Turfgrass is four times more effective than a hay field in controlling erosion or sediment run off.
 - ⌚ Sediment losses from turfed areas are 10 times less than from straw or mulch of covered areas.
 - ⌚ Natural Turfgrass traps and removes dust and dirt from the air.
 - ⌚ 250 square metres of Natural Turfgrass can absorb carbon dioxide from the atmosphere and release enough oxygen for a family of four.
 - ⌚ Natural turfgrass in an average size lawn of a residential property has the cooling effect of about 9 tonnes of air-conditioning.
 - ⌚ On a hot day a Natural Turfgrass lawn will be at least 15°C cooler than asphalt and 8°C cooler than bare soil.
 - ⌚ Natural Turfgrass lawn is also effective in reducing noise.
- In studies at the Riverbank Acoustical Laboratory in Illinois, Natural Turfgrass proved to be more sound absorbent than a heavy carpet or a felt pad.

Industry Fact Sheet is published by Turf Queensland as part of the Industry Development Services for the Queensland Turf Industry project. This project has been funded by Horticulture Innovation Australia Limited using the turf industry levy, co-investment from Turf Queensland and funds from the Australian Government
